

Purple Fusion™

Scaevola humilis 'PFS100' ♂

NATIVE SHRUBS & GROUND COVERS

An abundance of purple to lilac flowers all year round.

- Unlike other *Scaevola* forms, the Purple Fusion™ plant grows much flatter and is a real ground cover.
- More drought tolerant than *Scaevola aemula* species, so it is a great choice for no irrigation areas.
- Purple Fusion™ *Scaevola* does not mound, so there is less cutting back required.
- Research has shown Purple Fusion™ *Scaevola* can handle hot, dry summers as well as cold down to -4° c.

Description	Non-mounding ground cover
Density	1-2 plants per m ²
Height & Width	20cm x 1.5m
Flowering	Small purple flowers from Sep-Dec and most other times of the year
Best Planting Time	March-November
Uses	Ground cover
Position	Sun to light shade; tolerates drought & frost
Soil Type	Most soil types
Care	Water as required for 8-13 weeks until established; trim once a year to keep tidy
Where it Works	QLD, NSW, VIC, TAS, SA & WA
