

Variegated Mundi™

Westringia fruticosa 'WES09' (D) Intended

NATIVE SHRUBS & GROUND COVERS

A stunning groundcover plant with cream and grey-green variegation and abundant white flowers in spring.

- Beautiful variegation with subtle and delicate appearance.
- Highly impressive drought tolerance and can tolerate periodic wet conditions.
- Grows even lower, slower, and tighter than the original Mundi™ *Westringia* due to fewer green parts of the leaves, yet it retains the toughness of original Mundi.

Description	Bright and vivid, with beautifully subtle and delicate variegation
Density	1 to 3 plants per m ²
Height & Width	40cm H x 1.5m W
Flowering	Abundant white flowers in spring
Best Planting Time	Plant in spring or autumn
Uses	Contrasting against other plants, cascading over rocks, roadside and path plantings, border plant next to taller plants, and in any garden for a naturally-looking plant, rain garden
Position	Full sun to part shade
Soil Type	Tolerates most soil types
Care	Water well for the first 6 weeks and top up watering may be required in the first summer. Responds well to fertiliser and prefers yearly or bi-yearly pruning
Where it Works	QLD, NSW, VIC, TAS, SA, WA & ACT (Prefers shelter from heavy frost in ACT)
